

# JOE doesn't start because of java: cairo-misc.c:380: \_cairo\_operator\_bounded\_by\_source: Assertion `NOT\_REACHED' failed.

## Error Situation

You get the following error when you start JOE

```
java: cairo-misc.c:380: _cairo_operator_bounded_by_source: Assertion `NOT_REACHED' failed.  
  
./jobeditor.sh: line 84: 3231 Aborted                (core dumped)  
"$JAVA_BIN" -classpath "$CP" ${LOG4JPROP} $JAVA_OPTIONS -DSCHEDULER_HOME="$SCHEDULER_HOME" -  
DSCHEDULER_DATA="$SCHEDULER_DATA" -DSCHEDULER_HOT_FOLDER="$SCHEDULER_HOT_FOLDER" sos.scheduler.editor.app.Editor
```

## Solution

- Rename ./user\_bin/jobeditor\_environment\_variables.sh-example to ./user\_bin/jobeditor\_environment\_variables.sh
- Edit ./user\_bin/jobeditor\_environment\_variables.sh. Put the following line at the end of the file.

```
JAVA_OPTIONS=-Dorg.eclipse.swt.internal.gtk.cairoGraphics=false
```
