

# Product Knowledge Guides

## Welcome to our Product Knowledge Guides

These guides are intended to help users from different branches of IT - management, engineering and service operations - to find the information they need to set-up, evaluate and operate JobScheduler as effectively as possible.

## Guides for Management and Software Architects

[Knowledge Guide - Platforms, Architecture and Feature Overview](#)

- [Introduction - Platforms and Architecture](#)
- [Introduction - Feature Overview](#)
- [Introduction - Licensing](#)
- [Introduction - Support and Services](#)

## Guides for Engineers

### Getting Started

Engineers find the information they need to evaluate JobScheduler and to get it up and running.

[Knowledge Guide - Getting Started](#)

- [Getting Started - Requirements & Installation](#)
- [Getting Started - Setting up jobs and job chains](#)
- [Getting Started - Licensing, Support and Services](#)

[Knowledge Guide - Getting Started with Agents](#)

- [Getting Started with Agents - Setting up a Master/Agent Architecture](#)
- [Getting Started with Agents - Configuring Jobs to Run on an Agent](#)
- [Getting Started with Agents - Further Information](#)

### Job Management

The following guides introduce engineers to job configuration and workflow management.

[Knowledge Guide - Basic Job Management](#)

- [Job Management - JobScheduler Object Configuration](#)
- [Job Management - Parameterization of Jobs and Orders](#)
- [Job Management - Basic Error Handling](#)
- [Job Management - Job Operations & Management](#)
- [Job Management - Workflow Control](#)
- [Job Management - Directory Monitoring & File Watching](#)
- [Job Management - JobScheduler Logging](#)

[Knowledge Guide - Advanced Job Management](#)

- [Job Management - Pre- and post-processing](#)
- [Job Management - Advanced Error Handling](#)
- [Job Management - Task Termination](#)
- [Job Management - Resource Contention Management](#)
- [Job Management - Cross-platform job scheduling](#)

[Knowledge Guide - Expert Job Management](#)

- [Job Management - Programming Interfaces](#)
- [Job Management - Performance Checks & Optimization](#)

### Guides for Developers

[Knowledge Guide - Job Development](#)

- [Job Development - Programming Interfaces](#)

### Guides for Service Operators

## Knowledge Guide - Service Operations

- [Service Operations - Deployment](#)
- [Service Operations - Planning](#)
- [Service Operations - Monitoring](#)
- [Service Operations - Reporting](#)
- [Service Operations - Maintenance](#)
